

**STOP WRESTLING
WITH
FLOATATION
DEVICES!**

**Enjoy the ride with
Aquatrek's River-Runner**

The Aquatrek River Runner is capable of floating up to 300lbs with the current of the leisure river. At three foot depth, the chair will begin to float with the current and is more stable than an inner tube. In deeper waters it reclines back for a comfortable ride. The transition from pool lift to River Runner is safer and easier to manage than trying to wrestle with an inner tube. Enjoy the ride!

Call Rehab Systems at 1-800-726-8620 or call your local aquatics dealer for more information, cost and availability.
